FIG. 1. (a) Ensemble mean of SST change patterns (K) in 17 CMIP5 models. Shown is global warming minus present day value. (b) Black line is the zonal mean SST changes, and shading stands for the uncertainty among different models. (c) Black line is the SST changes averaged between 5°S and 5°N, and shading shows the uncertainty of the zonal SST changes among the 17 models (one std deviation).

CMIP5 models, we will demonstrate that the future warming patterns described in Figs. 1b and 1c are, to a large extent, determined by the present-day climate mean state and modulated by atmospheric wind, moisture, and temperature changes.

2. Model description and methodology

Seventeen CMIP5 model outputs were used for the current analysis. The leading reason to use only 17 model outputs is that variables we intended to analyze (e.g., separate upward and downward longwave radiation) were not available from all models at the time of this analysis. Another reason was limited disk space. Because of these reasons, we could only analyze 17 CMIP5 models (see Table 1 for a list of these models). It has been shown by some previous studies (e.g., Vecchi and Soden 2007; Pithan and Mauritsen 2014) that the basic features of SST warming patterns were quite similar among CMIP models. Monthly surface temperature, surface heat fluxes, surface wind, air temperature, and specific humidity in the troposphere from the models listed in Table 1 are analyzed. Clear-sky downward longwave radiation and shortwave radiation at the surface are available from 13 of 17 models listed in Table 1 (marked by asterisks), which are also analyzed. All the variables are derived from table “Amon” in the CMIP5 output, where surface temper-

PlumX

- Новый инструмент компании EBSCO по использованию альтернативных метрик для измерения значимости научно-исследовательской работы и объема цитирования публикаций отдельных специалистов/научных сотрудников.
- Система нового поколения оценки (метрики) деятельности ученых, базирующаяся не только на цитировании
- PlumX относится к категории альтметрик, использует свыше 20 типов артефактов (статьи, книги, главы из книг, видео, презентации и прочие производные деятельности ученого)

Сводный обзор показателей

- пример сводного обзора показателей, который можно настроить для научного сотрудника, группы исследователей, научного журнала и т.д.
- Схема в верхнем левом углу на рисунке ниже наглядно демонстрирует значения основных коэффициентов по пяти ключевым категориям: **цитирование, использование, упоминание, сохранение и социальные медиа.**
- Здесь же можно получить и более подробную информацию по каждой категории.

Визуализация значимости исследовательской работы

- PlumX представляет также графические схемы для более наглядной демонстрации эффекта научной работы. В такой форме можно представить показатели, как одного научного сотрудника, так и отдела, лаборатории, научного журнала, отдельного выпуска. Также можно сгруппировать источники по любому другому важному для конкретной организации принципу. На сайте нажмите “View Sunburst” (показать в формате спектральной диаграммы), далее нажмите “Type” (тип) или “Impact” (значимость) в левом верхнем углу, чтобы оценить, как значимые артефакты соотносятся в анализе результатов цитирования/упоминаний.

Совместимость PlumX

- PlumX совместим со всеми системами, которые используются в организациях для отслеживания значимости научно-исследовательской работы. Также можно создать профили научных сотрудников с нуля: загрузить фотографию, добавить ссылки или соответствующие адреса, а также библиографическую информацию.

Library Journal by Bonnie J.M. Swoger, August 29, 2013

PlumX является аналитическим инструментом, позволяющим помочь библиотекарям и администраторам научно-исследовательской деятельности оценить влияния труда их ученых используя новые альтернативные метрики, наряду с традиционными методами оценки исследований...

Для университетских издательств

- Для повышения узнаваемости и популяризации русскоязычных журналов, EBSCO проводит работу по лицензированию журналов в своих базах данных.
- Для включения журнала в базы данных EBSCO необходимо предоставить реферат на английском языке и полный текст на русском в формате pdf.
- Специалисты EBSCO предоставят необходимые документы для заполнения и лицензионное соглашение.
- Журнал будет включен в базу данных EBSCO, которая соответствует предметной области и тематике журнала.
- Журнал будет доступен пользователям ресурсов EBSCO во всем мире.
